

Our **Deck Stone** is a structural lightweight concrete decking material. It is environmentally friendly with no maintenance. We offer **Deck Stones** in two color lines. The Standard line - Sand, Brown, Charcoal, and Walnut. The Premium line offers a wide variety of color choices. Premium **Deck Stones** are sealed to lock in color and give the stone UV protection along with skid resistance. **Deck Stones** are great for Decks, Docks, and Patios.

Installation

Over standard framing techniques lay 2x4's on their side and fasten at 1 ft. on center. Apply a bead of polyurethane caulk and drop the Deck Stones in place. Then fasten a trim board of choice around the perimeter to hold Deck Stones in place and that's it. You can place a spacer between the Deck Stones and caulk to simulate grout.

Waterproof Deck

Fasten plywood down over framing and cover with rubber roof material. Place composite stripping over rubber roofing 1 ft. on center. Bevel bottom of stripping to eliminate sharp edges. Extend stripping over edge of deck so water is allowed to escape behind trim board. Gutter can be installed below trim and behind rubber roofing. Caulk stripping with polyurethane caulk and set Deck Stones in place.

We recommend framing to carry a 50 lb. per sq. ft. load.

Deck Stone Specs

Size: 24 x 24 x 1 1/2

Strength Test: 2000 + Lbs.

Weight is approx. 9.5 Lbs. per sq. ft.

Easy to cut

Also available in 16 x 16 x 1 1/2
