Discover your imagination.

Dare to Dream.

Imagination. That one thing that helps us see things not the way they are – but what they could be. It's more than a wish. It's more than an idea. It is reality waiting for a chance to form. At Hy-Lite®, we think a little imagination can change the way you live. Inside this book, you'll find idea after idea dedicated to helping you tap into your imagination with the virtually limitless applications of acrylic block. Use the ideas as they are, or better yet, combine them, refine them, make them your own. Anything is possible, when you discover your imagination.®

Whatever you want.

Limits need to be stretched.

For most people, limits are what define their world. At Hy-Lite®, the desire to know what is beyond the limits is what defines ours.

New Construction

Showcasing a variety of new construction window applications, Hy-Lite® can turn an ordinary home into an extraordinary home. Offered with both aluminum and vinyl frames and pre-assembled for simple installation, Hy-Lite® acrylic block new construction windows add a special touch anywhere they are used. Available in operable vinyl-framed Casement, Awning and Hopper window styles as well as stationary designs, Hy-Lite® acrylic block new construction windows come in a variety of block patterns and colors to complete a total customized look.

History doesn't have to repeat itself.

Typically, replacing windows in a home leaves little to the imagination. Fortunately, no one has ever accused us of being the slightest bit typical.

From a large, dramatic frosted wave block window glowing at the top of a stairwell to Picture window sidelites in a quaint living room, Hy-Lite® retrofit windows are just as stunning as our new construction designs. Surrounded by maintenance-free premium vinyl frames, Hy-Lite® retrofit windows work individually or in conjunction with more traditional window styles. For windows that combine the beauty of block with the functionality of a traditional window, Hy-Lite® operable windows fit the bill beautifully. With custom sizes, multiple block patterns and colors, Hy-Lite® retrofit windows are a brilliant alternative to traditional window replacement.

*Boundaries are
simply a starting line.*

When it comes to kitchen renovation, most companies start by showing you the basics. At Hy-Lite®, we start by finishing your dreams.

 *Kitchen*

Since everyone always ends up in the kitchen anyway, why not give them something wonderful to look at? From an illuminated center island to a one-of-a-kind back-splash, Hy-Lite® acrylic blocks don't just add style and flair. They add personality. Because of the varied block patterns and color options, you can create virtually any look – from understated traditional accents to bold, unforgettable contemporary designs.

Bend the rules more than once.

When it comes to bathroom enhancement, some say a good rule of thumb is to not get too ambitious. At Hy-Lite®, we have one more thing to say. Why not?

Bath

Because the durable acrylic surface and the specialized, synthetic caulking compound cannot be damaged by water and are easy to clean and maintain, Hy-Lite® blocks offer wider bath applications than other block construction. Hy-Lite® radius walls are completely prefabricated and available in a variety of arcs. Since Hy-Lite® block panels can be used for shower enclosures, partitions and even cabinet structures, your bath can be designed almost any way you'd like. From a stylistic, streamlined contemporary oasis to a romantic, soothing place to let your hair down. With a variety of color options and block patterns including a frosted wave design for privacy, Hy-Lite® acrylic blocks make any bath completely unforgettable.

Color outside the lines.

With a little imagination, you'll discover the same thing we did. Some of the best places to use Hy-Lite® acrylic blocks are where you never thought about using them at all.

Accents

There are so many ways to use Hy-Lite® acrylic blocks throughout your home, there's really no way to provide a comprehensive list. Let's just say if you can come up with an idea, it's a pretty safe bet Hy-Lite® can come up with a way to help you out – for both new construction and remodeling applications. It may be a line of evenly spaced single blocks bordering the top of a kitchen to catch the warmth of the early morning sun. It might be multiple patterns of block shapes and colors built into the wall cascading above a fireplace. Or maybe it is an illuminated wall partition dividing a family room or den. No matter where or how they are used, Hy-Lite® acrylic blocks are a beautiful way to add style and individuality to any home.

It is not the size of the problem, it is the size of the solution.

Hy-Lite® acrylic block panels and windows are a strong alternative to traditional glass block construction. Made of lightweight acrylic, the blocks are connected by

Technical Information

resilient polymer clips and are pre-assembled into panels or complete window units for precision installation.

Because the blocks are over 75% lighter than conventional

Specially formulated caulking seals every block perimeter with lines that are smooth and perfectly straight.

block construction, it allows them to be used virtually anywhere. In addition, because of their lightweight nature, there is little chance of the blocks sagging or caulk lines cracking over time.

Comprehensive Warranty

All Hy-Lite® block, panels, windows and hardware components are backed by a comprehensive 10-year warranty for confident peace of mind.

Locating a Supplier

To locate a Hy-Lite® supplier in your area, call 1-877-712-4013. For international information from outside the U.S., call 1-877-712-4014.
